

A Kirti Meghana

+91 7011147287 | akmeghana29@gmail.com | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Aspiring Software Engineer with hands-on experience with Full-stack development and Machine Learning. Proficient in writing clean, maintainable, and efficient code in Python and Java with strong command over Data Structures and Algorithms, Object Oriented Programming and System Design. Experienced in building and deploying end-to-end ML pipelines and MERN stack applications with version control, software testing and debugging skills, seeking to contribute towards innovative and efficient engineering solutions.

EDUCATION

B. Tech (Computer Science Engineering)	Sharda University	CGPA: 8.20/10	2026
AISSCE (Class XII), CBSE	Bharatiya Vidya Bhavan's School	Percentage: 93.67%	2022
AISSE (Class X), CBSE	Bharatiya Vidya Bhavan's School	Percentage: 90.00%	2020

SKILLS

Languages and Databases: Java, Python, JavaScript, SQL, MySQL, MongoDB

Tools and Technologies: Express.js, React.js, Node.js, Bootstrap, REST API, jQuery, Flask, Django, Docker, Git, GitHub, Web Design, Postman, Linux, AWS Cloud, Vercel, Render, GenAI, RAG, LLM

Technical Concepts: Data Structures and Algorithms, Database and Querying, Object-Oriented Programming, System Design, Unit and Integration Testing, Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Data Science

Soft Skills: Adaptability, Leadership, Resilience

PROJECTS

Legacy Data Extraction and Management Tool | Full Stack, ML and Deep Learning | [Github Link](#) | [Web App Link](#) Jan 2026

- Built a pipeline to extract text from unstructured legacy documents, digitizing noisy government archives.
- Fine tuned detectron2, TrOCR with 2000+ annotations, integrated post-OCR correction using SymSpell, achieving CER of 7.01% and WER of 14.21% on highly degraded texts. Published a research paper at an IEEE conference.
- Trained YOLOv8 with page wise annotations for table extraction from pdf to excel sheets achieving 86.03% mAP@50.

Virtual Team Collaborative Workspace | Full Stack, RAG and LLM | [Github Link](#) | [Web App Link](#) Oct 2025

- Deployed a remote collaborative workspace using MERN stack to manage tasks, deadlines, and share resources.
- Implemented dynamic task scheduling using a Min-Heap priority queue to auto-reallocate tasks or update deadlines.
- Integrated a RAG model built with LangChain, FAISS, and Llama 3.1 70B which generates a grounded, document-aware response achieving 92.37% retrieval accuracy and MRR@5 of 0.91 on documents shared by the team members.

Food Waste Management System | Full Stack, Machine Learning and Data Science | [Github Link](#) | [Web App Link](#) Aug 2025

- Engineered a web app using MERN stack for hostel mess to predict quantity of food to be prepared aimed to reduce food wastage.
- Deployed React frontend on Vercel, Node.js/Express backend, Flask ML microservice on Render with MongoDB Atlas as database.
- Collected past 5 years of hostel attendance and meal records and trained a Gradient Boosting model achieving R^2 of 0.9946 and an MAE of 6.26kg. This tool causes a significant drop in food wastage from 45-50kgs to approximately 5-10kgs per day.

WORK EXPERIENCE

Software Engineer Intern | CloudNixia Software Solutions (OPC) Pvt Ltd Jun 2026 to Present

- Implemented REST API integration for automated enrollment notifications and designed backend logic, supporting feature enhancements for the EduArn LMS platform.
- Resolved critical bug fixes across 4 MERN stack modules, optimizing JavaScript frontend components, fixing responsive design issues and resolving state management inconsistencies, reducing application load time by 1.2 seconds and improving overall system stability.
- Built modules for course enrollment and batch management along with a student progress tracking system, developing Node.js backend services and adding new React frontend components for course listings, enrollment forms, and enrollment status widgets, handling management of 200+ student records.
- Managing version control using git for deploying and tracking application releases, conducting testing across CI/CD pipelines, while assisting senior developers on ongoing development tasks across the platform.

Oct 2024 to Jan 2025

Machine Learning Intern | LearnNex

- Built end-to-end ML pipelines for sales forecasting using Python and Flask, experimenting with 3 ML models and optimizing data preprocessing and EDA workflows to achieve 71% reduction in overall pipeline processing time.
- Containerized 3 application services using Docker, enabling scalable, production-ready deployment environments.
- Integrated 7 RESTful API endpoints to serve ML model predictions with an average response time of 300-500ms, enabling seamless communication between the frontend and backend.

CERTIFICATIONS/COURSES

[Link of all Certifications](#)

- Google AI Essentials Certification - July 2026
- Complete Data Science, ML, DL, NLP, Bootcamp - May 2025
- Database Foundations by Oracle Academy - Oct 2024
- Summer Bootcamp on Data Science - Jun 2024
- Java Fundamentals by Oracle Academy - Mar 2024
- The Complete 2023 Web Development Bootcamp - Sept 2023

ACHIEVEMENTS AND INTERESTS

Achievements:

- Awarded Best Paper Presentation Award at an IEEE conference for research paper presentation - 2025
- Received Meritorious Student Award by Honorable Chief Justice of India - 2023

Interests:

- Exploring new Technologies and Developer Tools, Public Speaking and Hosting, Indian Classical Dance
